After a single dose of D 860, the beta cells show pronounced degranulation and loss of insulin. This insulin loss is compensated 3 hours after D 860 has been administered due to new production of the hormone. At the same time, a maximum increase in nucleus size is found in the beta cells. The alpha cells participate in this process, through nucleus size enlargement and (Biological Sciences--Pharmacology, TT, v. 8, no. 6)
